

Full Stack Developer

Become a code-summoner in all areas.

Your tasks:

- Implementation and planning of user stories with the help of our own ONTOLIS project management software
- Implementation of interfaces to other applications such as CMS, CDP or source code management systems
- Implementation of improvements to the software core
- Implementing your own ideas and wishes for the software platform
- Keeping up with the times in terms of technology, software generation and secure programming

Your qualifications:

- Completion of a university degree in a field equivalent to computer science or qualification as a programmer
- As much experience as possible
- Interest in abstract models
- Fun with philosophical concepts and abstract ideas
- Knowledge of our software stack or interest in getting to know it

Would you like to become part of the ONTOLIS development team and drill deep into the ONTOLIS core?
