

 **IT Project Manager (m/w/d)**

Be the interface between management and team members!

Your tasks:

- Management of internal ONTOLIS projects from the idea to product launch
- Supervision and support of team members
- Establishing and reviewing procedures and guidelines
- Managing requirements and acceptance criteria
- Co-operation and coordination with other project managers
- Quality assurance: Integration of all relevant parts in the ONTOLIS workflow
- If interested: Supervision of customer projects

Your qualifications:

- Degree in a technical field (ideally IT) and/or recognized certification in project management
- Experience in IT project management
- Experience in the environment of "software development"
- Leadership skills, initiative and commitment
- Solution-orientated way of working
- Communication skills and a sense of responsibility

Du möchtest für gute Stimmung in Projekt-Teams sorgen und kennst die Eigenheiten einer „Software-Klitsche“?
