🪄 Ontology Architect

Develop new concepts based on ontology for us and our customers!

Your tasks:

- Development of new concepts based on ontology with our ONTOLIS software platform
- Further development and implementation of existing ONTOLIS concepts
- Support in the realization of customer-specific requirements
- Realization of your own ideas and wishes in our ONTOLIS software platform
- Supporting new team members to enhance expertise

Your qualifications:

- Degree or training in a field equivalent to computer science, communications, philosophy or linguistics
- As much experience as possible
- Ability to think abstractly & unthinkable ideas
- Basic understanding of ontologies and philosophy
- Logical thinking
- Ability to work in a team
- Ability to work independently & on your own responsibility

Do you often think differently to others and want to visualize and share your ideas?
